Summary

I am currently a fourth-year student of Computer Science and Engineering at the International University of Sarajevo (IUS). During my studies, I participated in numerous team and independent projects, through which I developed strong communication skills, responsibility and a strong affinity for teamwork.

I have practical knowledge in the programming languages C++, Java, and GDScript, experience in working with SQL databases (MySQL), as well as the basics of web development (HTML, CSS, JavaScript) and object-oriented programming. I am particularly interested in web and game development, but also in the development of functional and sustainable software solutions.

During my professional practice in the IT sector of BHRT, I gained experience in SQL data migration, working with databases, structuring metadata and technical documentation, which gave me insight into the operation of real production systems.

Knowledge and skills

- Project management
- Team work
- Communication skills
- Development of 2D games, with an emphasis on mechanics, physical systems and player movement, as well as optimization and improvement of the user experience
- Programming and project development cycle
- Object-oriented design and databases
- Creativity
- Active knowledge of the English language
- Discipline, goal orientation, independence, etc.

Education

- First gymnasium Sarajevo.
- International University of Sarajevo (IUS), Computer Science & Engineering (2022 - today).

Foreign Languages

English – Active (C1)

German – Passive.

Professional knowledge

Programming languages: **HTML, CSS, JavaScript, C++, Java, OOP, GDScript, Python, SQL, MySQL.**
